

Virgin plum oil comes from the Ente Plum, a variety of the Prunus Domestica species, grown in Organic Farming in Lot et Garonne for the production of the flagship product of our region: Agen BIO AOP Pruneau.

The various marketing operators sell an increasingly large portion of pitted ORGANIC Agen Prunes. This stone, which in the past was waste destined for destruction, is now used and produces new added value: it is said to be up-cycled.

Botanical species

Prunus Domestica

Agricultural area

South West France

Sourcing type

Agro Industry

Cultivation method

Organic

Local Sourcing

Final process area

South West France (Perles de Gascogne)

Part used

Almond

Mode

First Cold Press

Additives

None

The stoness obtained are sent to us daily in order, after several operations, to extract the almonds. For this purpose, the successive operations are carried out in a dedicated workshop, and are the washing of the kernels (water), in order to remove the remains of pulp, the drying of the entire kernel (hot air), in order to stabilize it, then the breaking and separation of the almonds and the shell (optical sorting). The almonds are then stored in a cold room and pressed as needed.

Up-Cycling

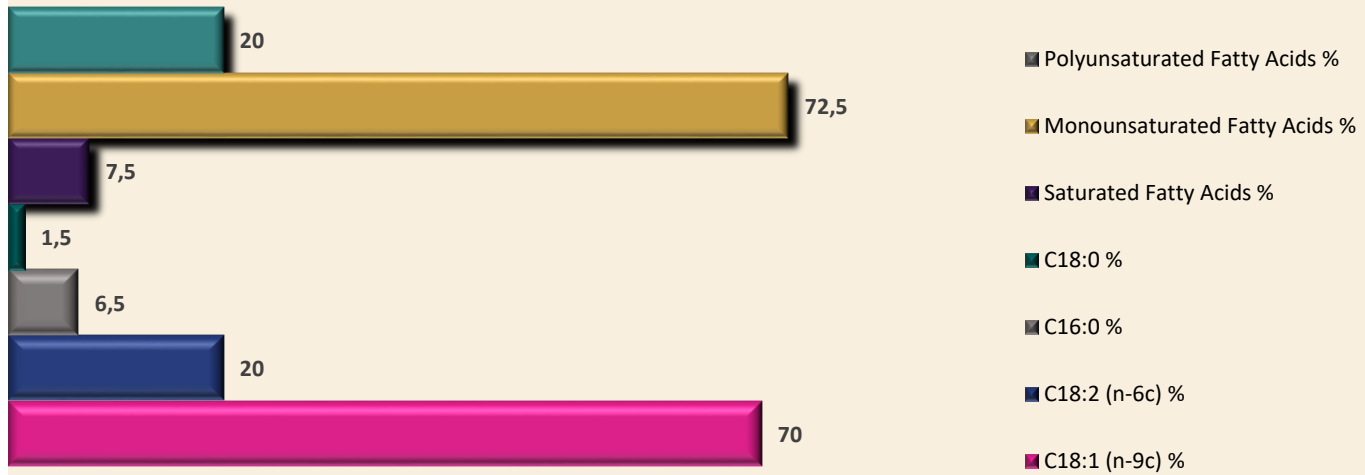

It should be noted that our stone washing water, sweetened by pulp residue, is completely methanized in order to produce biogas. The shells separated from the almonds, made up almost entirely of cellulose and lignin, are also used for the production of energy in biomass boilers or the production of our exfoliating powders. The almonds are finally cold pressed to extract our delicious organic virgin plum oil.

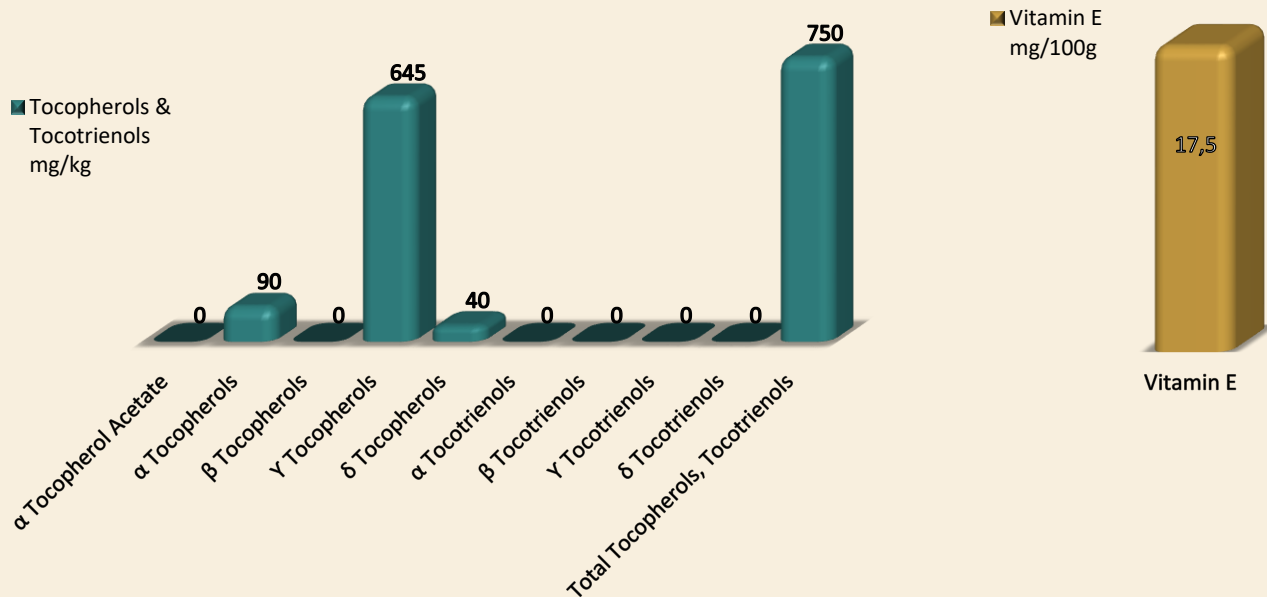

Quality Criteria

Peroxide Index	<10	meqO2/Kg
Acid Index	< 4	mg KOH/Kg
Saponification Index	188-199	Without

FATTY ACIDS COMPOSITION

UNSAPONIFIABLE

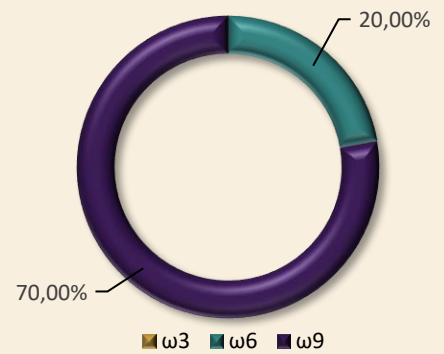

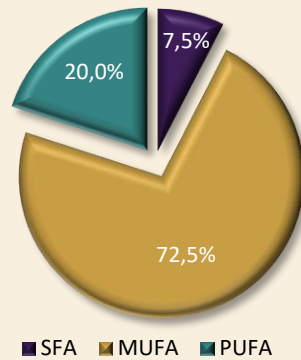

Rich In Vitamin E (mainly γ tocopherols)

SFA:
Saturated Fatty Acids

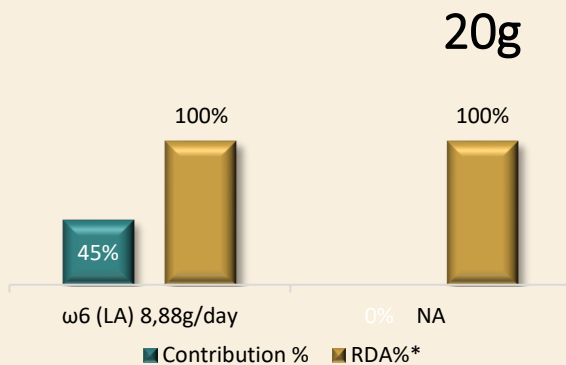

MUFA:
Monounsaturated Fatty Acids

PUFA:
Polyunsaturated Fatty Acids

Mainly composed of Oleic acid (MUFA and ω9) and linoleic acid (PUFA and ω6), this oil is low in saturated fatty acids. This composition ensures good stability and, thanks to other factors, interesting nutritional and health qualities.

*RDA: Recommended Dietary Allowances
(Ref ANSES)
ANSES: National Agency for Food Safety,
Environment and Labour (French equivalent
of USDA)

Composed of 20% linoleic acid (LA), essential fatty acid (EFA), a consumption of 20g/day (1.5 tablespoons) provides 45% of Omega 6 needs.

NUTRITIONAL CLAIMS

Is naturally rich in Vitamin E

Is naturally rich in monounsaturated fatty acids

HEALTH CLAIMS

Linoleic acid contributes to maintaining normal cholesterol levels. The beneficial effect is obtained by the daily consumption of 10 g of linoleic acid.

Consumption of fats rich in unsaturated fatty acids in the diet as a substitute for fats rich in saturated fatty acids has been shown to lower/reduce blood cholesterol levels. High cholesterol levels are a risk factor for the development of coronary heart disease.

Vitamin E helps protect cells against oxidative stress

ORGANOLEPTIC DESCRIPTION

8

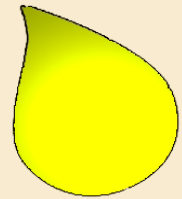

Intensity (1 to 10)

Sustained golden yellow,
dark green highlights

Group

Gold

9

Intensity (1 to 10)

Intense flavor of almond, slight toasted
notes

Group

Dry fruit

UTILISATIONS

Heating

$\geq 180^{\circ}\text{C}$

$\leq 180^{\circ}\text{C}$

No Heating

Store preferably in a cool, dry place and away from light and heat.

*A true kitchen perfume, virgin plum oil is an exceptional
flavoring ingredient.*

*Cold or hot, it brings aromatic diversity and can, through
its exceptional power, serve as a flavor enhancer.*

*The delicate and subtle scent of almond blends wonderfully with mirabelle plums.
Perfect combination to prepare my tasty specialty of foie gras with mirabelle
plums. Chef Thomas FRANCOIS, At 12 (57-Delme in Moselle)*

SENSORY ANALYSIS TOUCH

Our Organic virgin Plum Oil is characterized by a very creamy touch, which will leave your skin with a satiny appearance and a feeling of softness.

Scale 0 to 9

DERMO COSMETIC PROPERTIES

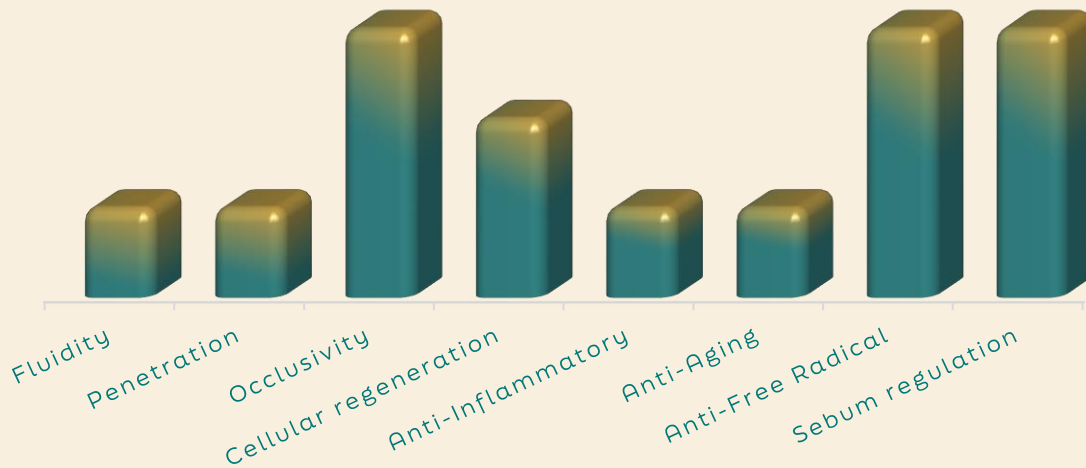

Non-comedogenic, organic virgin plum oil is very stable against oxidation, thanks to its richness in γ -tocopherols and has a complete property profile, with particular mention for its affinity with the hydro-film lipidic and a very pleasant sensation to the touch.

Comedogenicity

0/5

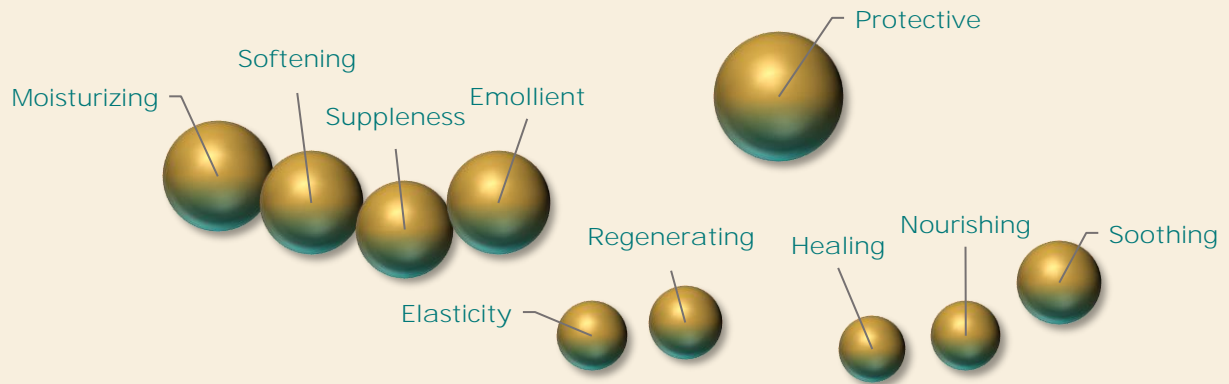

Oxidative sensitivity

1/4

DERMO COSMETIC BENEFITS

Organic virgin plum oil is very protective and emollient, leaving skin softened and supple.

Particularly recommended for dry skin, it will nevertheless satisfy all skin types, even sensitive or mature. It is also ideal for dry hair.
