Good for you and our environment: Mineral protection against sunlight!

ey! sun spray with its mineral protection against sunlight offers you reliable protection against UVA and UVB rays. Be good to yourself and your skin and start looking after its well-being today. If you avoid sunburns and unprotected radiation now, you can significantly delay the skin ageing process. The result is that your skin will remain smooth and healthy for a longer time. In addition you contribute to the protection of the water world if you bathe, swim, dive or practice any other water sport.

The spray is completely biodegradable and causes no harm to organisms in lakes, rivers and seas

**ey! Sunspray SPF 20, 30, 50 and
ey! Sunspray Kids SPF 50+**

According to your specific needs and skin type:

Choose from ey! sunspray with mineral sun protection factor (SPF) 20 for every day, SPF 30 e.g. for short periods of sunbathing or walks or SPF 50 for extended periods of sunbathing and at the height of summer.

For delicate children's skin and extra sensitive adult skin use the highest sun protection factor with mineral SPF 50+, with UVB protection of at least 60!

Content: 100 ml, spray tube

ey! Shimmering Aftersun Spray

Pamper your skin after a day in the sun with lasting moisturizing care, The antioxidants, vitamins and minerals of the power fruit pomegranate support your skin by keeping free radicals in check and preventing wrinkles from developing. Mica, tiny natural glittering mineral particles, lend your skin an irresistible, glamorous shimmer. For good measure there is also an SPF 10 on top. Then even the evening sun can do you no harm!

Content: 100 ml, spray tube

- ✓ water resistant
- ✓ carbon neutral produced
- ✓ no nanotechnology
- ✓ biodegradable
- ✓ free of synthetic sunscreen filters

Special characteristics:

Sunspray suitable for body and face.

Specially developed for quicker application and a pleasant skin feeling.

Directions:

Apply before sunbathing. For body and face.

Can be applied very easily, evenly and without leaving any residue.

Even in the shade use a sunscreen product with a sufficiently high sun protection factor.

Applying sunscreen repeatedly does not prolong the period of protection.

May stain clothing.

Consider your individual skin type

Balanced UVA/UVB protection with a ratio of 1-3

Important note:

Apply generously and repeatedly before sunbathing, especially after spending time in water. Applying in small amounts will reduce the protective effect. Do not expose children to the sun during peak sunshine hours.

Sunburns must be avoided under all circumstances. For babies and young children use protective clothing and sunscreen products with a high sunscreen factor (more than 25). Sunscreen products with a high sunscreen factor do not, however, offer complete protection against UV-rays.

Do not stay too long in the sun even while using a sunscreen product.

Excessive exposure to the sun poses a serious health risk.

Do not expose infants and young children to direct sunlight.
